A SYSTEMIC VISION OF THE CRISES

From optimization to change strategy?

10th congress of the European Union for Systemics (UES2018)

15-16-17/10/2018, Brussels, Belgium

Call for proposals: sessions / workshops

Submissions before April 29th 2018.

The Organizing committee of the 10th congress of the European Union for Systemics (EUS) calls for individual contributions for its congress entitled “A Systemic Vision of the Crises” (UES2018).

All individual contribution propositions must be submitted as a summary and have to be sent by email before April 29th 2018 (summary has to be a Word compatible format, in English or in French, maximum 250 words and has to be sent as an attachment to ues2018@ues-eus.org).

Each submission will be evaluated by peers – at least three members of the congress’ Scientific Committee – based on their relevance, their breadth and their depth regarding the theme of the congress, but also the topicality and the purpose of the submitted subject.

The authors of the validated submissions will be asked to contribute via full-text articles (Word compatible format, in English or in French, maximum 6000 words, formatted following the instructions contained in the style file downloadable on: http://aes.ues-eus.eu/AES00_Template-contributions.doc).

If necessary, the summary can also be written in your mother tongue. The slides will have to be written in English or in French and the oral presentation will have to be conducted in English or in French as well.

The contributions are an integral part of the UES2018 congress and the documents validated by the Scientific Committee will be published in the [Acta Europæana Systemica](#) (AES), n°8, 2018 magazine.
